### **DETAILED ACTION**

1. Claims 1-38 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention provides a new system and method for using a printed document encoded with a message, wherein the benefits of a computer display is combined with the benefits of a paper document to provide large amounts of relatively static information while using computing devices to provide relatively small amounts of up-to-date information, and the combination serves as a replacement both for large display and a large keyboard (see specification, page 2, lines 19-27).

Particularly, the new system and method comprise the following features, which the prior art taken either singly or in combination does not teach:

- an image analyzer coupled to the image sensor to determine relative motion of the image sensor and extract absolute locations and fragments of the message from the images, wherein the image analyzer extracts the message from the fragments using the known mapping (see independent claims 1, 15, and 26);

- the printed document being further encoded with fragments of a message distributed across a plurality of locations on the printed document, the fragments being correlated with an encoded absolute location within the printed document; and determining identification of the image sensor from which a request for information is originated, the information request being determined by a scanning of a portion of the printed document by an image sensor, the image sensor determining a relative location on the portion of the printed document corresponding to relative motion of the image

sensor, and the requested information being related to the scanned portion of the printed document (see independent claim 35).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
